RE: Chase Interiors emergency response scenario working
with the U.S. Environmental Protection Agency

The start of final clean up of Chase Interiors by the U.S.E.P.A., which was scheduled for mid January, will now begin in March, weather permitting. The harsh winter and temperatures have made it impractical to do testing, sampling and containment of the chemicals in question.

Bonnie Green, on site coordinator for the U.S.E.P.A., asked this office to contact you suggesting a participation of your departments in a working scenario for an emergency response in conjunction with the U.S.E.P.A. on site. She emphasized that there would be no rating involved, but only the opportunity to work together and the learning experience for all concerned.

When the U.S.E.P.A. arrives on site and has their staging in place, Bonnie Green will contact you for your input on this proposed scenario relationship. This office has told her that the Village is most fortunate to have three fine departments such as yours serving us.

Please give your thought and consideration to this proposal, and when Bonnie Green calls let her know if your department can participate. At this point in time, she thought they would be ready in late March or early April.
